

# Production Maintenance Fitter

- PCB Manufacturing Company
- Challenging and Rewarding
- Brisbane Northside Location

An excellent opportunity for you to join our successful specialised PCB manufacturing company, located in Lawnton, (Strathpine area - approximately 25 minutes north of Brisbane CBD).

We are looking for an experienced Maintenance Fitter to take responsibility for the preventative and breakdown maintenance of machinery and equipment across our manufacturing operation.

Ideally you will have experience in a manufacturing environment, have an understanding of Hydraulics and Pneumatics, and be confident in providing General Mechanical Repairs and Solutions to Pumps, Motors, Conveyors and the like.

You must also and be competent in Stainless Steel Welding using TIG, and of course, be able to use a lathe.

There is scope to learn usage of a CNC Lathe and Milling Machine operation if you are looking for more of a challenge, and crave learning something new. (Experience with these machines is not a requirement for this position).

You will have a "can do attitude", enjoy working unsupervised, and possess excellent troubleshooting and problem solving ability.

You must definitely pay attention to detail and have very thorough and methodical work techniques.

The plant operates from 6am - 6pm (Mon-Fri) and is closed on weekends. Hours for this position would be approx. 6am - 2pm plus overtime as required.

This is a Full-Time position and an immediate start and attractive package is available for the right person.

Applications close 5pm, Friday 16<sup>th</sup> December, 2005

Please send your Application to [geoff@becman.com](mailto:geoff@becman.com)
